

- **Free 5 IP Cyber Security Vulnerability Assessment** - Our Cyber Security Specialists remotely tests 5 IP addresses at an end user to predict vulnerability to cyber threats. Assessment includes a detailed report on findings, plan for next steps and mitigation. Based on findings, a Statement of Work and a Bill of Materials may be provided
- **Free Wireless/RF Planning Assessment** - Our Wireless Network Engineers will use information collected from one of our team representatives to remotely develop a robust plan for wireless connectivity and the infrastructure needed to provide it. A full Bill of Materials, an installation quote, and a Statement of Work for Configuration may be provided.
- **Free Physical Security Assessment** - Our Physical Security Engineers design video surveillance, door access, intercom, and emergency notification solutions remotely based on information provided by one of our team representatives. A full Bill of Materials, an installation quote, and a Statement of Work for Configuration may be provided.
- **Free Digital Signage Assessment** - Our Digital Signage Design Engineers work remotely to design a complete digital signage solution. Content Design, Content Management Software, Players, Screens, Accessories and installation will be provided in a Bill of Materials. A detailed Statement of Work for Configuration may be provided.
- **Free ProAV Site Assessment** - Our ProAV Engineers work remotely to design a comprehensive solution for conference rooms, classrooms, auditoriums and other environments where sound systems, projectors, interactive displays, and room controls are desired. A full Bill of Materials, an installation quote, and a Statement of Work for Configuration may be provided.
- **Free Video Conferencing Assessment** - Our Video Conferencing Engineers remotely design a complete Video Conferencing to scale to the environment and the need. Our Engineers will provide a comprehensive design including a Bill of Materials, an Installation quote, and a Configuration Statement of Work.
- **Free Virtual Inventory Report** - Our Network Engineers use tools to remotely collect data that provides an inventory of network devices and workstations connected to a domain. Our engineers will provide a report and suggestions based on the findings for opportunities to remediate.
- **Free Onsite Power Review Assessment** - Our Power Engineers will perform an onsite walkthrough to evaluate the UPS and TVSS strategy and deployment for the site.

***If you had trusted  
tools to move, you  
forward to the next  
level in technology  
would you do it??***
